OBJECTIVE

Highly driven Full Stack Developer with 3+ years of hands-on experience in designing, developing, and optimizing dynamic web applications using the MERN stack and WordPress CMS. Proven success in improving system performance, creating custom interactive tools, and enhancing SEO to drive measurable business results. Recognized for a meticulous approach to debugging, clean code practices, and continuous learning in emerging technologies such as React Native and Unity. Passionate about delivering high-quality, scalable digital solutions that exceed client expectations.

EXPERIENCE

Full Stack Developer | MedicalProfessionals – Full Time

MARCH 2024 – PRESENT

- Creating custom JavaScript-based tools and animations, improving user engagement within LMS modules.
- Developing a full MRI simulator and mammography tool to enhance interactivity and realism in radiologic education.
- Optimizing a large-scale WordPress website with over 1,000 pages, improving SEO, reducing load times by 25%, and increasing organic traffic by 40%.
- Developing custom PHP code, plugins, and themes, enhancing WordPress functionality, fixing bugs, and ensuring stable, scalable performance.
- Leveraging Git and GitHub Desktop for version control, improving team collaboration and deployment consistency.
- Applying React Native in real app development.
- Building an interactive operating room using Unity and C#, deploying it with a custom preloader for seamless background loading.
